New Jersey's coastline is a rich and diverse fabric of natural wonders and economic engines that improve our quality of life and enrich our economy. Businesses, tourists, and residents are drawn to New Jersey's coast for its many economic and recreational opportunities.
NJDEP Coastal Permits Program

- Coastal industries contribute enormously to New Jersey's economy. Coastal land provides crucial habitat for a wealth of wildlife, including migrating birds, commercially valuable fish and shellfish, and sporting and recreational species.
Coastal Protection and Enhancement

Are you considering buying property near tidal water? Building an oceanfront home, a retail center, or marina? Do you want to put in a bulkhead or a dock? Or maybe an addition to an existing house in a coastal town? In each of these cases, New Jersey's coastal permit program may affect where and whether you buy, build, or add on. In New Jersey and throughout the United States, coastal property is regulated to protect public safety and the environment.

NJDEP Coastal Permits Program

- Are you considering buying property near tidal water? Building an oceanfront home, a retail center, or marina? Do you want to put in a bulkhead or a dock? Or maybe an addition to an existing house in a coastal town? In each of these cases, New Jersey's coastal permit program may affect where and whether you buy, build, or add on. In New Jersey and throughout the United States, coastal property is regulated to protect public safety and the environment.
NJDEP Coastal Permits Program

- New Jersey protects coastal waters and the land adjacent to them under a variety of laws, including the Waterfront Development Law (N.J.S.A. 12:5-3), the Coastal Area Facility Review Act (N.J.S.A. 13:19), and the Wetlands Act of 1970 (N.J.S.A. 13:9A). The Department of Environmental Protection (DEP) applies the New Jersey Coastal Permit Program Rules, N.J.A.C. 7:7, and the Coastal Zone Management Rules, N.J.A.C. 7:7E, to determine what may or may not be built under these three laws.

What Geographic Areas and Activities are Regulated?

- **THE WATERFRONT DEVELOPMENT LAW (N.J.S.A. 12:5-3)**

- **TIDELANDS ACT (N.J.S.A. 12:3)**
CAFRA (N.J.S.A. 13:19)

CAFRA applies to projects near coastal waters in the southern part of the State.

- The CAFRA area begins where the Cheesequake Creek enters Raritan Bay in Old Bridge, Middlesex County. It extends south along the coast around Cape May, and then north along the Delaware Bay ending at the Kilcohook National Wildlife Refuge in Salem County. The inland limit of the CAFRA area follows an irregular line drawn along public roads, railroad tracks, and other features. The CAFRA area varies in width from a few thousand feet to 24 miles, measured straight inland from the shoreline.

CAFRA (N.J.S.A. 13:19)

- The law divides the CAFRA area into pieces or zones, and regulates different types of development in each zone. Generally, the closer you are to the water, the more likely it is that your development will be regulated.
- The CAFRA law regulates almost all development activities involved in residential, commercial, or industrial development, including construction, relocation, and enlargement of buildings or structures; and all related work, such as excavation, grading, shore protection structures, and site preparation.
The Waterfront Development Law is a very old law, passed in 1914, that seeks to limit problems that new development could cause for existing navigation channels, marinas, moorings, other existing uses, and the environment.

If you are proposing any development in a tidally flowed waterway anywhere in New Jersey, you need a Waterfront Development Permit.
Examples of projects that need a Waterfront Development Permit include docks, piers, pilings, bulkheads, marinas, bridges, pipelines, cables, and dredging.

For development outside of the CAFRA area, the Waterfront Development Law regulates not only activities in tidal waters, but also the area adjacent to the water, extending from the mean high water line to the first paved public road, railroad or surveyable property line. At a minimum, the zone extends at least 100 feet but no more than 500 feet inland from the tidal water body. Within this zone, DEP must review construction, reconstruction, alteration, expansion or enlargement of structures, excavation, and filling. However, this part of the law does not apply within the Hackensack Meadowlands Development District.
**TIDELANDS ACT (N.J.S.A. 12:3)**

- Tidelands, also known as "riparian lands" are lands now or formerly flowed by the tide of a natural waterway. This includes lands that were previously flowed by the tide but have been filled and are no longer flowed by the tide. These lands are owned by the people of the State of New Jersey. You must first get permission from the State to use these lands, in the form of a tidelands license, lease or grant, and you must pay for this use.

---

**How Do I Tell if My Property is Regulated Under the Coastal Permit Program?**

There are several ways to gather information on whether a property is regulated.
Where Am I?

- To get a rough idea of whether your property is in the CAFRA area, consult the CAFRA Zone Map.

Where Do I Go?

- If your county or public library has a GIS (Geographic Information System) computer system, view the CAFRA maps and the coastal wetlands maps on their computer.
Still Need Help?

- For a definite determination of whether your property is regulated, write to the DEP at the address on the right asking if the property is regulated under the DEP Coastal Permit Program. Include the street address and block and lot number for the property, and a map showing the location of the property.

501 E. State Street
P. O. Box 439
Trenton, NJ 08625

Are There Any Exemptions?

- CAFRA contains exemptions for certain minor activities such as maintenance, plantings, decks or similar structures at a residence, rebuilding a damaged structure on the same building footprint (if it was damaged after 7/19/94), and enlarging a dwelling without increasing its footprint or number of units. Contact LUR for a complete list of available exemptions.

- The Waterfront Development Program exempts the repair, replacement or reconstruction of some legally existing docks, piers, bulkheads and buildings, if the structure existed before 1978 and if other conditions are met. Also, there are exemptions for certain single family homes and for small (5,000 square feet) additions to certain existing structures, if the single family home or structure is located more than 100 feet inland from the mean high water line.
I think I Need A Coastal Permit. What do I do?

- If you think your project might need a coastal permit, you can get more information by looking at some of the documents on our forms and checklists page on our website. WWW.NJ.GOV/DEP/LANDUSE/COAST or contact LURP directly by calling the numbers listed on the next slide.
