

FREE ECO-FRIENDLY YARD KITS

MANALAPAN, MONROE, JAMESBURG, SPOTSWOOD, & HELMETTA

Make your yard more eco-friendly! How you treat your home landscape can directly impact local waterways. Rutgers Cooperative Extension of Middlesex County is providing free EcoFriendly Yard kits to residents of the Manalapan Brook watershed which includes Monroe, Jamesburg, Spotswood, Helmetta, and Manalapan.

The kit includes native, flowering plants and a Rutgers soil test to determine the soil health of your lawn or garden. This project runs through May, 2022 while supplies last.

Here's how it works:

Step 1 Go to <https://go.rutgers.edu/EcoYards> (or scan the QR code on this flyer) and search for your address in the Manalapan Brook Watershed online map. If your address is in the watershed go to step 2.

Step 2 Watch the video "Rain Barrels to Rain Gardens: Protecting Your Watershed At Home" available at <https://go.rutgers.edu/EcoYards>. Note: you must view the video and be located in the watershed to qualify for the kit.

That's it! Once you've watched the video, enter your email to receive instructions about picking up your EcoFriendly Yard kit. The deadline to participate is May, 2022.

This project is part of the Manalapan Brook Watershed Restoration Project. Funding is provided by the NJ Department of Environmental Protection and the Rutgers New Jersey Agricultural Experiment Station. Contact Michele Bakacs at bakacs@njaes.rutgers.edu or 732-398-5274 with questions.
